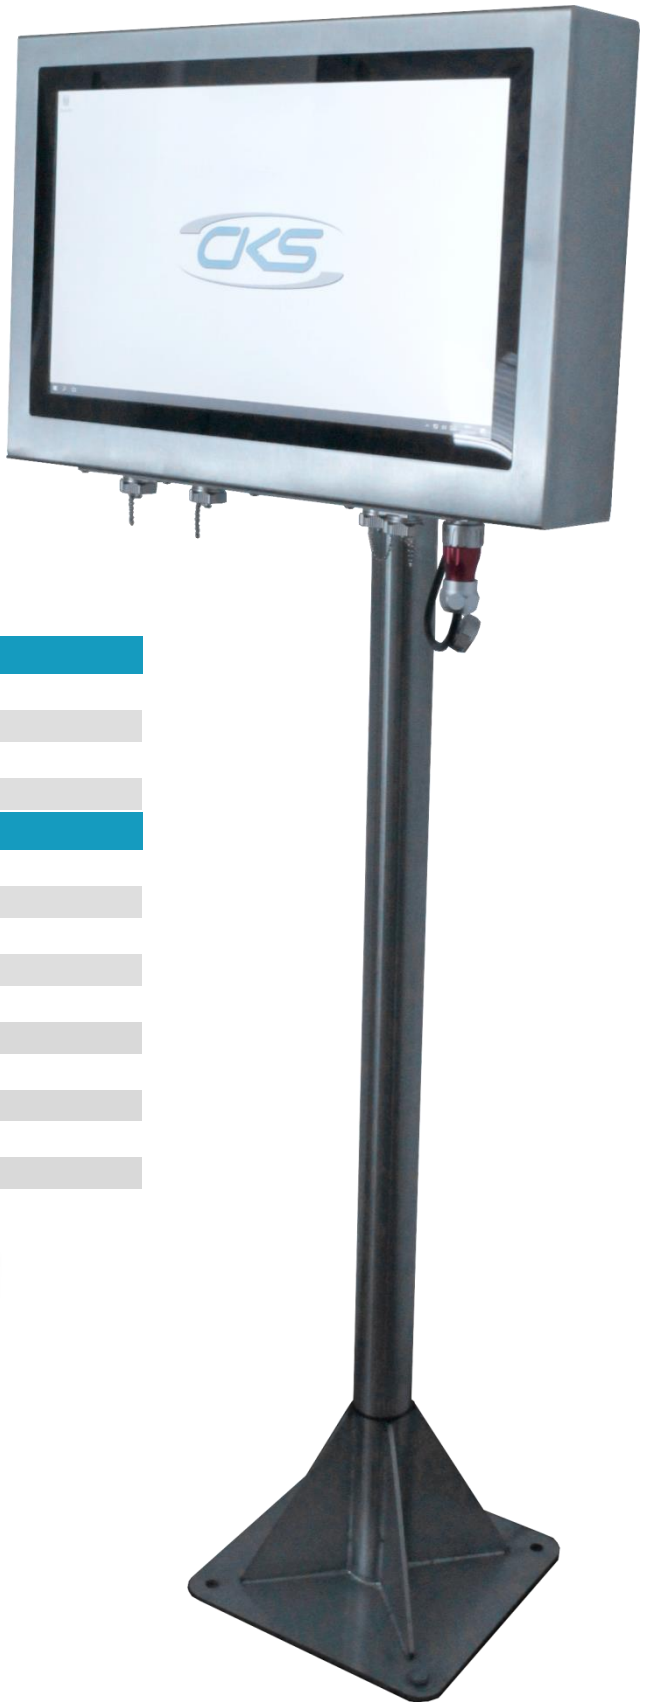
Stainless Steel Workstation Assembly



Overview

The Work station assembly has been designed to be used in industrial environments.
The tough stainless steel finish makes it ideal for harsh applications and suitable for wash down areas.
It allows the mounting of our standard stainless steel ClientPC, ThinClient or SlimMonitors with the option of being assembled together with either a stainless steel 96T, 96P, 128T or 128P keyboard to either a sturdy wall or our own stainless steel floor mount pedestal.
