Overview VD81 vacuum meter

- Chemically resistant ceramic sensor with FKM sealing, suitable for rough industry environment

- Insensitive against contamination

- Adjustable min. logging rate of 50 ms for fast processes, e. g. for the area of vacuum packaging

- Gas-type independent measurement

Overview VD8 vacuum meters

- Can be used as a portable instrument or for permanent installation in vacuum facilities. The gauges can be operated by a battery or a plugin power supply

- Integrated data logger for up to 2000 measurement values

- Vacuum meters can be placed directly into a vacuum chamber, connected to an appliance with their flange or with a suitable adaptor

- Storage of minimum and maximum pressures achieved during measurement

- Pressure units: mbar, Torr, hPa

- High battery lifetime due to cycled measurements; the user can choose between automatic switch off (time adjustable) for battery saving or continuous operation

- USB interface for easy push button data transfer to PCs, but no PC connection is necessary during measurements

- VacuGraph™ Windows Software: To visualize, analyze and save measurements on a PC (lite version free of charge)
