

eOne MA

Analogue electromagnetic dosing pump with constant flow

eOne Ma is an electronic dosing pump with a "CLEVER" control of power, depending from the effective dosing conditions

General Features

- Flow rate control depending from pressure variation of the installation
- Energy saving
- Low heating of the device
- Low wear of mechanical and electrical components
- High injection frequency (up to 300 pulses/minutes)
- Manual flow rate adjustment by a knob
- Dual scale adjustment: **0 – 20% and 0 – 100%**.
- Proportional mode 1:1 by water-meter pulse-sender signal
- Multi-tension Power supply: 100 and 250 Vac 50/60Hz
- Pump head made of **PVDF**, polymer highly resistant, with all sealings in **TFE/P**, which is a new elastomer compatible with a wide variety of chemicals
- Manual air bleed pump head, except for the models 20.07 and 30.05.
- Level probe input
- Supplied with PVDF installation kit
- Flow rate: from 1 to 30 l/h
- Maximum pressure: up to 20 bar
- Stroke rate: from 180 to 300 impulses/min
- Diaphragm: PTFE
- External casing: Reinforced PP and chemical resistant

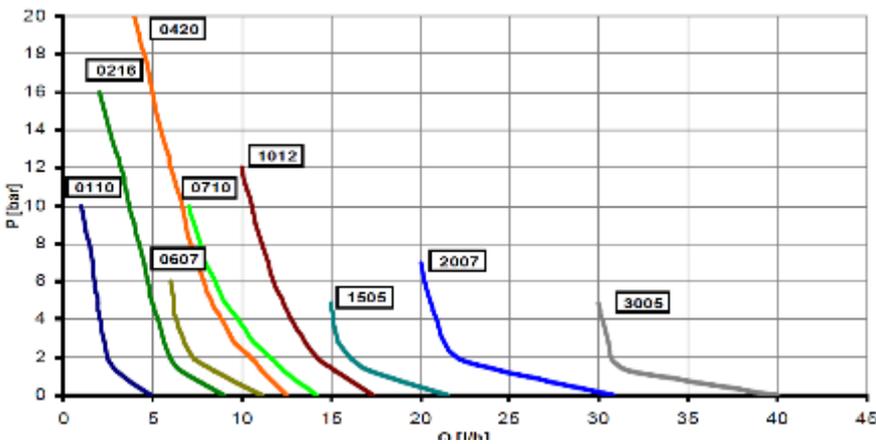

Pump failure alarms (Underload/Overload)

- **Underload alarm** (Suction alarm): for low (end) chemical level, blocking suction valve or damaged suction tube
 - **Overload alarm** (Discharge alarm): for over pressure inside the pump head, for excessive operating pressure inside the dosing pipeline, for clogging delivery valve...
-

Technical Features

Model	Flow rate l/h – (US gal/h)	Pressure bar - psi	Injection Volume (cc)	Max frequency (pulse/min)	Connections Int/Ext (mm)	Power supply	Power consumption Min/Max (W)
