

Powering Business Worldwide

Solenoid Operated Directional Valve

DG4V-3-60 Design

General Description

Solenoid operated directional control valves are for directing and stopping flow at any point in a hydraulic system.

- Efficient control of greater hydraulic powers without increasing solenoid power consumption.

- Installed cost and space savings from higher power/weight-and-size ratios.

- Installation flexibility resulting from choice of numerous combinations of solenoid connectors and locations.

- Viton seals as standard for multi-fluid capability. Nitrile seals available as a model code option.

- Higher sustained machine productivity and higher uptime because of proven fatigue life and endurance, tested over 20 million cycles.

- Solenoid coils can be changed quickly and easily without leakage from hydraulic system.

- Compact, cost effective system design when used with Eaton® SystemStak™ valves and subplates.

DG4V3-S/R- High Performance and Standard Performance Valves

- Minimum pressure drop 2.5 bar at 30 l/min

- Range of coil connectors including DIN, Deutsch, AMP and terminal box
- Range of coil voltages and power options

- Up to 80 l/min (21 USgpm) and up to 40 l/min (10.5 USgpm) respectively at 350 bar (5000 psi).

- Offers designers the opportunity to select the optimum value package for each application.

- International standard interface. The valve mounting face conforms to ISO 4401, size 03 and is compatible with related international standards.

DG4V-3 Model Series

1 Seal Type

Blank – Viton
F6 – Buna Nitrile/High CAN

2 Model series

4 – Solenoid operated
V – Pressure rating 350 bar (5000 psi) on P, A & B ports
3 – ISO4401 Size 03

3 Performance

Blank – High performance
S – Standard performance
R – Standard performance with 8 Watt coil

4 Spool Type

Please refer functional symbols on Page 5 for spool types.

5 Spool Spring Arrangement

A – Spring offset, end-to-end
AL – Same as “A” but left hand build
B – Spring offset, end to center
BL – Same as “B” but left hand build
C – Spring centered
N – No-spring detented

6 Manual Override Option

Blank – Plain override(s) in solenoid end(s) only ▲
H – Water-resistant override(s) on solenoid end(s) ▲
Z – No overrides at either end
W – Twist and lock override in solenoid ends•

▲ No override in non-solenoid end of single solenoid valves
 • DC high performance only

7 Solenoid Energization Identity

Blank – None
V – Solenoid “A” is at port “A” end and/ or solenoid “B” is at port “B” end, independent of spool type

NOTE: Used to select the identification of the solenoid. Refer to table on page 4.

8 Flag Symbol

M – Electrical options and features

9 Spool Indicator Switch

S7 – Spool position monitoring switch. Single solenoid valves only.
NOTE: Refer Page B-6 and B-10 for further details

10 Coil Type

U – ISO4400, DIN43650 connector
U1 – ISO4400 fitted with PG11 plug
U6 – ISO4400 with fitted DIN plug with lights
KU – Top exit flying lead (150mm)
KUP4 – Junior timer (Amp) connector
KUP5 – Integral Deutsch connector
KUPM4L – Integral M12, 4-Pin connector
FW – Flying lead with 1/2” NPT thread wiring housing
FTW – Fly. lead wired terminal block & 1/2” NPT thread wiring housing
FPA3W – Fly. lead, 3 Pin connector & 1/2” NPT thread wiring housing
FPA5W – Fly. lead, 5 pin connector & 1/2” NPT thread wiring housing
X4 – Atex approved coil, ‘me’ type
X5 – Atex approved coil, ‘d’ type▲
 ▲Also CSA and UL approved

11 Surge Suppressor/Damper

D1 – Diode positive bias
D2 – Negative bias
D7 – Transorb type

See Page12 for circuit details

12 Solenoid Indicator Lights

Blank – None
L – Solenoid indicator lights▲
 ▲Flying lead coil type only

13 Coil Rating

B – 110V AC 50Hz/120V AC 60 Hz
BL – 110V 50 Hz/120V 60 Hz
D – 220V AC 50 Hz/240V AC 60 Hz
DS – 28V DC 30 watt
ER – 120V AC 60 Hz ▲
ES – 240V AC 60 Hz ▲
G – 12V DC
GL – 12V DC
H – 24V DC
HL – 24V DC
HM – 24V DC 8 watt
 ▲X5 coil type only

14 Tank Pressure Rating

Refer to “Operating Data” for port T pressure ratings.
4 – 70 bar (1000 psi) ▲
5 – 100 bar (1500 psi) for standard performance models, DG4V-3S, with AC or DC solenoids.
6 – 207 bar (3000 psi) for AC high performance models, DG4V-3, including spool position indicator type S6.
7 – 207 bar (3000 psi) for DC high performance models, DG4V-3, including spool position indicator type S6.
 ▲X5 coil type only

15 Design Number

60 – Basic design
61 – Type 8 spool

16 Special Features

“EN***” code number assigned as required.

EN21 – CSA approved models with 1/2” NPT entry conduit box, type FW and solenoid coil letter B,D,G, or H.
EN38 – Low leakage version. Typical leakage 5ml/min/land at 100 bar.

NOTE: EN38 valve spools have additional overlap and resulting 2X pressure drop compared to standard valve spools.

17 Orifice Plug

00 – No orifice required
03 – 0.3 mm dia.
06 – 0.6 mm dia.
08 – 0.8 mm dia.
09 – 0.9 mm dia.
10 – 1.0 mm dia.
13 – 1.3 mm dia.
15 – 1.5 mm dia.
20 – 2.0 mm dia.
23 – 2.3 mm dia.

Functional Symbols

Spool Options

B

The valve function schematics apply to both U.S. and European valves.

This product has been designed and tested to meet specific standards outlined in the European Electromagnetic Compatibility Directive (EMC) 2004/108/EC. For instructions on installation requirements to achieve effective protection levels see this leaflet and the Installation Wiring Practices for Vickers Electronic Products leaflet 2468. Wiring practices relevant to this Directive are indicated by  Electromagnetic Compatibility (EMC).

Input:

Supply Voltage	20-32 VDC
Reverse Pol. Protection	Yes
	outputs with alternating function - PNP

Output:

Max output load	<=400mA ; Duty Ratio 100%
Short Circuit Protection	Yes
Hysteresis	<=0.05mm
Electrical connector	M12x1 4-Pole
Thermal shift	<=±0.1mm

Plug connections:

Pin 1	+ Supply
Pin 2	Normal Closed
Pin 3	0V
Pin 4	Normal Open

EMC	Protection DIN EN 61000-6-1/2/3/4, Aug 2002
Humidity	0-95% rel. (nach DIN 40040)
Protection Class	IP65 DIN 40050
Vibration 0-500Hz	Max. 20g
Shock	Max. 50g

• Factory setting ensures this condition under all combinations of manufacturing tolerance and of temperature drift (see "Temperature Limits").

M12 4 PIN CONNECTOR DETAILS

Customer's protective ground connection

WARNING: Electromagnetic Compatibility (EMC)

It is necessary to ensure that the unit is wired up in accordance with the connection arrangements shown above. For effective protection the user's electrical cabinet, the valve subplate or manifold and the cable screens should be connected to efficient ground points.

In all cases both valve and cable should be kept as far away as possible from any sources of electromagnetic radiation such as cables carrying heavy current, relays and certain kinds of portable radio transmitters, etc. Difficult environments could mean that extra screening may be necessary to avoid the interference.

▲ "B" plugged Δ "A" plugged ○ "P" plugged

For other viscosities, pressure drops approximate to:

Viscosity cSt (SUS)							
14	20	43	54	65	76	85	
(17.5)	(97.8)	(200)	(251)	(302)	(352)	(399)	
% of Δp							
81	88	104	111	116	120	124	

A change to another specific gravity will yield an approximately proportional change in pressure drop.

The specific gravity of a fluid may be obtained from its producer. Fire resistant fluids usually have higher specific gravities than oil.

DIN 43650 Connector

Cable diameter range:

Ø6–10 mm (0.24–0.40)

Wire section range:

Ø,5–1,5 mm² (0.0008–0.0023 in²)

Terminals:

Screw type

Type of protection:

IEC144 class IP65, when plugs are fitted correctly to the valves with interface seals (supplied with plugs) in place.

Connector can be positioned at 90° intervals on valve by re-assembling contact holder into appropriate position inside connector housing.

Connectors with and without indicator lights are available (order separately):

Electrical Plugs and Connectors

Terminal strip and lights

For valves with type "F" coils.

1. For DC coils the +ve lead(s) must be connected to the terminal(s) marked +. When using 3-wire incom-

ing leads to double solenoid valves (i.e. common neutral) the inner pair of terminals must be interconnected.

2. For correct light indication of energized solenoid ensure that solenoid leads are correctly connected: light

terminals are common with each outer pair of solenoid terminals according to the side with + mark.

Insta-Plug

DG4V-3(S)—FPA—60
DG4V-3(S)—FPBW—60

Eaton 2-part "Insta-Plug" eliminates breaking electrical inputs for valve disconnect. A male half is pre-wired to the valve body. The mating

plug is inside a wire housing with external terminals for machine wire connections.

Captive thumb screws, when loosened, permit the wire housing to be pulled clear of the valve for disconnect. A longer ground post provides first make/last break ground connection.

PA configuration

Dimensions in mm(in).

Electrical Plugs and Connectors

NFPA Connector T3.5.29-1980

DG4V-3(S)-FPA3W(L)-**-60
 DG4V-3(S)-FPA5W(L)-**-60

The receptacle is a standard three or five pole connector with shortened leads and terminals added. The five pole plug has four leads 101,6 (4.0) long and one 177,8 (7.0)

long. The three pole plug has two leads 101,6 (4.0) long and one 177,8 (7.0). All wires have underwriters recognized non-solder insulated eyelet terminals. The green wire is used for the ground (earth) connection (No. 8 screw furnished). Valves are supplied pre-wired.

DG4V-3(S)-*B(L)(-**-)(V)M-FPA5W(L)

Surge Suppression Devices (For DC Valves)

Standard diode (D1), (D2)

Diode in parallel with coil, positive bias. When switch (S1) is opened, the energy stored in the coil is trapped and dissipated by the diode (D1), (D2).

- Works only with DC voltage
- Polarity dependent
- Increase drop out time

Surge Suppression Devices (For DC Valves)

Standard diode (D2)

Diode in parallel with coil, negative bias. When switch (S1) is opened, the energy stored in the coil is trapped and dissipated by the diode (D2).

- Works only with DC voltage
- Polarity dependent
- Increase drop out time

Transzorb (D7)

Diode and Zener diode in parallel with coil. When switch (S1) is opened, the energy stored in the coil is trapped and dissipated by the diode (D1) and Zener diode (Z1) and the coil resistance.

- The Zener makes exact limitation of inductive spikes.
- Works only with DC voltage
- Polarity dependent

NOTE: These surge suppression devices are "Polarity Dependent." Proper biasing conditions must be met when installing/connecting a coil in a system. Times represent cessation/application of voltage to coil versus velocity (start/stop) of a cylinder using a single solenoid, spring offset valve (time in milliseconds).

Valve Shift and Dropout Times with and without Surge Suppression

Shift	Dropout	
CETOP 3
