

Leak Detectors

**BACHARACH**<sup>®</sup>

The Measurable Difference

## Dual Purpose Leak Detector Informant<sup>®</sup> 2

### Combustible Gas

Detects leaks of combustible gases sensitive to 50 ppm (methane).

### Refrigerant

Detects leaks in refrigerant systems by locating halogens in CFC, HCFC, HFC and blends.

The Informant<sup>®</sup>2 is the only dual-purpose leak detector for detecting both combustible and refrigerant gases and is ideal for residential and commercial heating and cooling contractors. Its unique combination of state-of-the-art sensor technology, advanced software design and microprocessor-controlled circuitry offers unmatched accuracy and detection speed. The Informant<sup>®</sup>2 utilizes patented semiconductor sensor technology to detect combustible gases and a patented heated diode sensor technology to detect refrigerants.

## Quick Change Sensors for Instant Detection

Easily switch sensor tips in just a few seconds with no need to adjust sensitivity levels, - it's taken care of automatically - even where high levels of background vapors or refrigerants are present. Gaining access to hard to reach areas is easy with the finely tapered sensor tip.

The Informant<sup>®</sup>2 leak detector features an audible indicator with a mute option coupled with sequential LEDs to monitor increasing concentrations of refrigerant or combustible gases. The bar graph display provides visual confirmation of leak concentrations and a flashing light leak rate indicator on the probe tip helps to visually define the sampling location.

## Informant<sup>®</sup>2 Features & Benefits:
