

ROTARY DRUM SCREEN FOR SMALL FLOWS

REF: TARO –MINI

Application:

- Solids filtration or screening (separation solid / liquid). Removal of fine solids comprised between 0,25 and 3mm.

Characteristics:

- Salher brand, model TARO-MINI.
- Equipment manufactured in GFRP (Glass Fiber Reinforced Polyester).
- Filtering cylinder manufactured in stainless steel AISI 316 by filament winding. Johnson type triangular profile.
- Opening sizes between 0,25 and 3mm.
- Automatic double cleaning system composed of scraper and pressurized water system cleaning of the filtering drum connected to water network.
- Flanged inlet, outlet and overflow GFRP pipes.
- Supports for above-ground installation.
- GFRP protection cover for filtering drum.

MATERIAL	SCREENING WIDTH [mm]	SCREENING HEIGHT [mm]	SCREENING LENGTH [mm]	GEAR MOTOR [kW]	FLANGES (E, S, R) DN
PRFV / AISI 316	730	700	720	0,09	80

Opening size [mm]	0,25	0,50	1,00	2,00	3,00
Flow	6,3	10,8	17,5	24,9	28,1
